

Nathaniel Tjandra (Product Owner)
Sam Woolledge (Scrum Master)
Anjali Dileep (Team Member)
Sruthi Jaganathan (Team Member)
Lilian Gallon (Team Member)

Sprint 2 Plan

Product Name - RentMyJunk
Team Name - RMJ Development Team
Sprint Completion Date - November 4, 2019
Revision Number - 2
Revision Date - 10/24/19

Goal - Finish our Minimum Viable Product

Task Listing, organized by user story -

User Story #1: As a user, I want to be able to create posts so that people can find my item and rent it.

	Tasks	Time	Story Points
1	Design 'Create Post' page front end (React)	4	5
2	Implement ability to send form information from webpage to database	10	5
3	Store new post information in database when received	2	5

User Story #2: As a user, I want to be able to search and find posts so that I can find items to rent.

	Tasks	Time	Story Points
1	Design 'Search' page front end (React)	2	8
2	Implement ability to request posts in database based on the	4	8

	search field (title searching only)		
3	Have database return appropriate search results	2	8
4	Design front end for search result display (React)	6	8

User Story #3: As a user, I want to be able to edit posts so that I can change the information on my post as I please.

	Tasks	Time	Story Points
1	Design 'Edit Post' page front end (React)	2	13
2	Have webpage send edited information to database	4	13
3	Have database update old posts with new information when edits are received	2	13

User Story #4: As a user, I want to be able to delete my old posts so that people won't find my post after I have already rented the item out.

	Tasks	Time	Story Points
1	Incorporate 'Delete' button on front end (React)	2	5
2	Have webpage tell database which post to delete	2	5
3	Have database delete a post when a deletion request is received	2	5
