# **Sprint 1 Report**

Product Name - RentMyJunk

Team Name - RMJ Development Team

Date - October 20 2019

#### **Actions to stop doing:**

As a team, we have decided to stop the following practices:

- Stop having video call meetings. It is easier to understand other team members' work with in person work sessions.
- Stop setting up meetings on back to back days. We have realized that meetings are more effective, if we have enough time to complete additional work in between them.

# **Actions to start doing:**

- Research additional libraries and frameworks (such as Angular or React), and improve the team's understanding of the currently implemented framework (Flask). This will expedite the website building process significantly.
- Have a more detailed description of each task on the scrum board. This will make it easier for team members to understand, and begin the tasks quicker.
- Make a more clear flow chart of how the application will work, of how the different pages will connect. Finalize the technologies we will be using for each part of the app.

#### Actions to keep doing:

- Monday morning meeting. Everyone can be there on time, and we are usually productive.
   We can review the work done during the weekend, and plan what has to be done during the week.
- Communicate to team members when a task has been completed
- Update Trello with each task's progress

### Work completed/not completed:
