Sprint 3 Report

Product Name - RentMyJunk
Team Name - RMJ Development Team
Date - November 17, 2019

Actions to stop doing:
- Approving (and merging) pull requests before testing
- Redoing tasks which have already been completed without discussion

Actions to start doing:
- Test pull requests completely before approving (giving opinion and pointing issues is not enough)
- Immediately resolve merge conflicts + resolve CI issues before requesting approval
- Posting known issues on "Issues" tab
- Regularly update the TRELLO board
- Use the TRELLO board properly:
  - assign yourself to a task only if you are actually working on it
  - if you are working on a task, make sure you assign yourself to it
  - create explicit task names
- Doing more unit tests on the backend
- User testing for the new release

Actions to keep doing:
- Reviewing pull requests before merging: giving opinion and pointing issues
- Continue to update our Scrum board as people take on tasks.

Work completed/not completed:
Sidebar Styling - Completed
Functioning Delete/Edit post - Completed
Register Account - Completed
Profile Page - Completed
Edit Profile - Completed
Login/Logout - Completed
Link Posts to Accounts - Completed

Searching - Completed
Get web hosting for database on AWS - Completed
